- $65.00
-

Why do YOU need one?

- You'll fall in love with stamping all over again when you learn everything you can do with it!
- Make multiples with ease
- Consistently stamp crisp clean images
- If you want a dar impression apply more ink and restamp – no need to start over
- Make fewer mistakes, saving time and money
- Easily create 2-step, 3-step and 4-step stamped images using reversible plates
- Develop new and specialized stamping techniques with adjustable stamping plates and precision placement

Tips:

- Be careful with the magnets! They are very strong and if they jump together they may break.
- Wrap your magnets with some washi tape so that if they accidently stick together you can slide them apart more easily
- If they break, Stampin' Up! will not replace them so be careful
- If you are stamping with photopolymer images try positioning your paper away from the corner or add a small shim under the foam mat to give it a bit of height.
- The Stamparatus can be used with photopolymer and clear-mount red rubber stamps - it can't be used with wood-mount red rubber stamps
